

Part 2 Research URLs:

<https://www.coolmathgames.com/>

One website I think is designed well is coolmathgames. On the visual side, it has a nice color scheme. A nice dark background with bright colors that highlight the different sections of games. It shows popular games and new games, both sections being popular ones. It also has a search bar along with a language chooser, which both aid with navigation of the website. Lastly, there's a nav bar along the top with the different genres of games and a genre search bar. All of these come together to make the site easily navigable and nice to look at.

ABOUT TETRIS®

Tetris® is the addictive puzzle game that started it all, embracing our universal desire to create order out of chaos. The Tetris game was created by Alexey Pajitnov in 1984—the product of Alexey's computer programming experience and his love of puzzles. In the decades to follow, Tetris became one of the most successful and recognizable video games, appearing on nearly every gaming platform available. This page is the official destination for free online single-player Tetris. Click PLAY to start playing one of the world's most popular puzzle games now!

OBJECTIVE

The goal of Tetris is to score as many points as possible by clearing horizontal lines of Blocks. The player must rotate, move, and drop the falling Tetriminos inside the Matrix (playing field). Lines are cleared when they are filled with Blocks and have no empty spaces.

As lines are cleared, the level increases and Tetriminos fall faster, making the game progressively more challenging. If the Blocks land above the top of the playing field, the game is over.

<https://tetris.com/play-tetris>

Tetris.com is a very well made website due to several reasons. Front and center is the game. It's the main focus of the website and that is made very apparent. In the middle you have the game very clearly. The settings, Q&A and other game options are highlighted clearly. The top menu bar isn't great, and could use more descriptive options but isn't disruptive to the rest of the site. The bottom of the screen features some background about Tetris. It tells you the history of it and the general rules of the game. On either side of the game screen are ads. They are relevant to the site and aren't too intrusive.

<https://joywavemusic.com/>

Lastly, joywavemusic.com. This is the website of my favorite band and I have a newfound appreciation for it after taking 1170. The site immediately shows you the newest album from the band, and gives you the option to listen to it. If you opt out, you can see the album art/gif in the background as the main centerpiece of the page. In the top right is a nav bar. Clicking it will give you a dropdown menu in the middle of the page, giving you clear directions to the bands merchandise, tour dates, YouTube channel, links to stream their music, and ways to contact them. Everything you need on a website for a band is there, and laid out cleanly and in a user friendly way.
